

Dr. Yongyuan Yin

Currently, Dr. Yin is a guest professor at Hong Kong University and Tsinghua University.

He was an environmental scientist with Environment Canada (1990-2012), and an adjunct professor with the University of British Columbia from 1995 to 2013.

Dr. Yongyuan Yin was involved in the 2015 *Lancet* Commission report entitled “Health and Climate Change: policy responses to protect public health”. He contributed to the preparation and writing of the health resilience and adaptation section of the Commission Report.

Dr. Yongyuan Yin was Chair of the Scientific Advisory Committee of the China-UK-Swiss collaboration project entitled “Adapting to Climate Change in China (ACCC)”. He has more than 25 years experience in climate change impact, vulnerability and adaptation, environmental science, natural resource assessment and management.

In 2015, he completed two projects with Professor Guixin Wang of Fudan University on “Low Carbon Urbanization Strategy in China” and “Shanghai 2050”.

He has a great deal of experience in managing large-scale interdisciplinary research projects on climate change. He was the PI of a project funded by GEF to study climate vulnerability and adaptation in western China responsible for the overall coordination of all project activities, providing strategic guidance and advice to the consortium, monitoring the performance and take necessary actions to ensure the successful implementation of the project. He led the integrated assessment (IA) team of two Canadian International Agency (CIDA) projects on carbon sequestration and climate adaptation in China. Among his over 150 publications, he published several books and book chapters on climate change and sustainable development.
